# Internet Governance

---

23 October 2024

Gergana Petrova | RIPE NCC

# Topics Covered

## Part 1

- What is Internet Governance
- Why and how to get involved?

## Part 2

- Debrief from the Summit of the Future and WSIS +20

# Self-Regulation

- Social norms worked well in the beginning of the Internet
- Self-regulation still works in a group with strong community ties, by applying peer pressure or exclusion (e.g. Wikipedia)
- ISPs try to self-regulate by imposing standards of behaviour for their customers
- Should ISPs make decisions in lieu of legal authorities? Should they judge what is acceptable?
- Self-regulation doesn't always work, e.g. IoT market

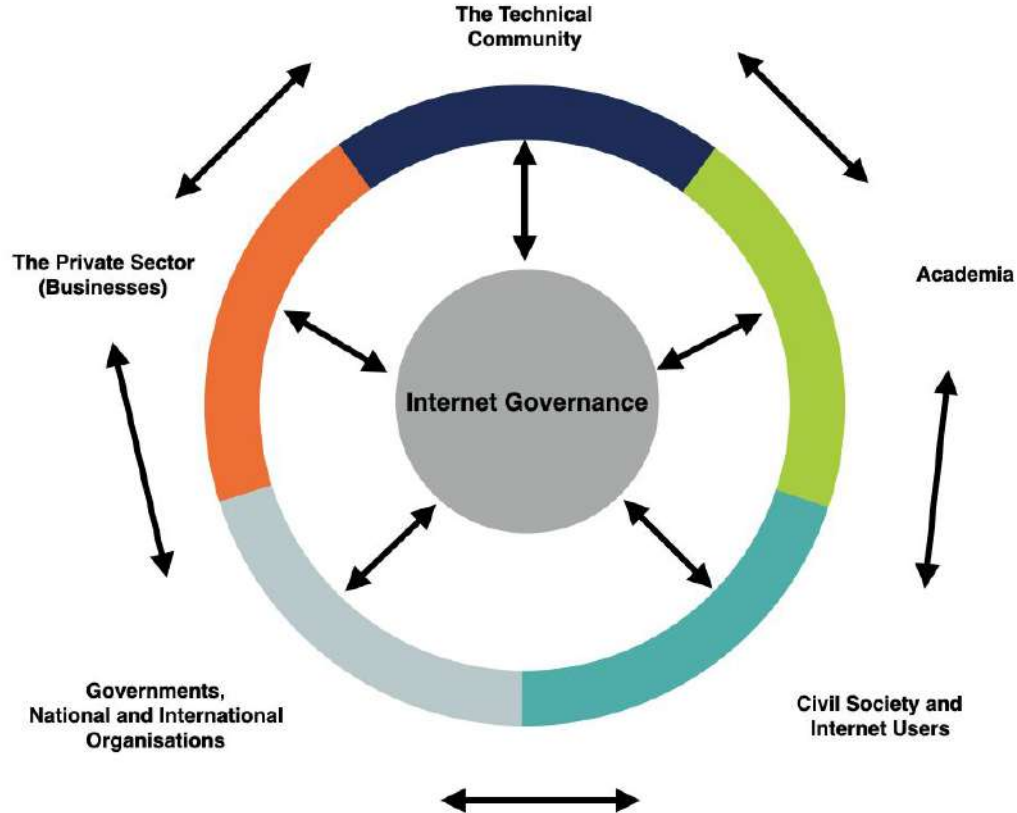

# What is “Internet Governance”?

*“Internet Governance (IG) is the development and application by governments, the private sector and civil society, in their respective roles, of shared principles, norms, rules, decision-making procedures, and programmes that shape the evolution and use of the Internet”*

- World Summit on Information Society (WSIS) 2005

# The Multi-Stakeholder Model

# Main Policy Making Principles

- Promote the open, distributed and interconnected nature of the Internet
- Maintain technological neutrality
- Encourage multi-stakeholder co-operation in policy development processes
- Ensure transparency, fair process, and accountability
- See [NetMundial](#), [OECD](#), [Council of Europe](#), etc.

# Centralised vs. Decentralised

*Small countries have limited human and financial resources to follow IG discussions*

*We want a one-stop-shop for IG issues preferably within an international organisation*

*The Internet is too complex to be placed under single governance umbrella or organisation*

*We want a multi-stakeholder approach*

# Small But Important Differences

**Information Security**  
(political and social stability)

**Cybersecurity**

**Cybersecurity**  
(protecting Internet infrastructure)

**Information Security**

# Why get involved?

- The wider Internet governance system is essential to the stability of the global Internet and should not be undermined
- Un- or ill-informed regulation can do a lot of damage
  - affect your operations and bottom line
  - affect RIPE NCC's own operations, bottom line and ability to serve our members effectively (sanctions, NIS (2) Directive)

# How to get involved?

- Attend IG events, either in person or online
- [EU consultations](#)
- Your national government's consultations
- Join the discussion on the [RIPE Cooperation Working Group](#)

Why the Technical Community's Voice Matters

[https://labs.ripe.net/author/suzanne\\_taylor\\_muzzin/why-the-technical-communitys-voice-matters/](https://labs.ripe.net/author/suzanne_taylor_muzzin/why-the-technical-communitys-voice-matters/)

- Largest forum for multi-stakeholder dialogue on public policy issues related to the Internet
- No negotiated outcome, instead:
  - Open and inclusive dialogue and the exchange of ideas
  - Inform and inspire
  - Facilitate a common understanding
- Yearly report and a summary of key messages

# Other IGFs

- EuroDIG (12-14 May 2025, Strasbourg)
  - Key messages from 2024: digitalising public services, messenger interoperability, EU policies (Data Governance Act and Data Act)
- SEEDIG (25-26 November 2024, Belgrade)
- CAIGF (summer 2025)
- Many national and Youth IGFs

# Recent History and Upcoming Events

- 2018 UN Secretary-General established the High-level Panel on Digital Cooperation as well as an IGF Leadership Panel
- 2021 UN Secretary-General published a report called Our Common Agenda in which he proposed a Global Digital Compact (GDC)
- Sept 2024: United Nations Summit of the Future
  - Agree on Global Digital Compact
  - Discuss role of the IGF as a source of multistakeholder expertise
- 2025: UN General Assembly
  - 20-year review of the World Summit on the Information Society
  - review the IGF's mandate

# Internet Governance e-learning Course

- Six self-paced modules: Text, images, videos, questions, activities
- Takes approximately 3 hours to complete
- Free to anyone

An Introduction to Internet Governance

[https://www.diplomacy.edu/wp-content/uploads/2021/12/AnIntroductiontoIG\\_7th-edition.pdf](https://www.diplomacy.edu/wp-content/uploads/2021/12/AnIntroductiontoIG_7th-edition.pdf)

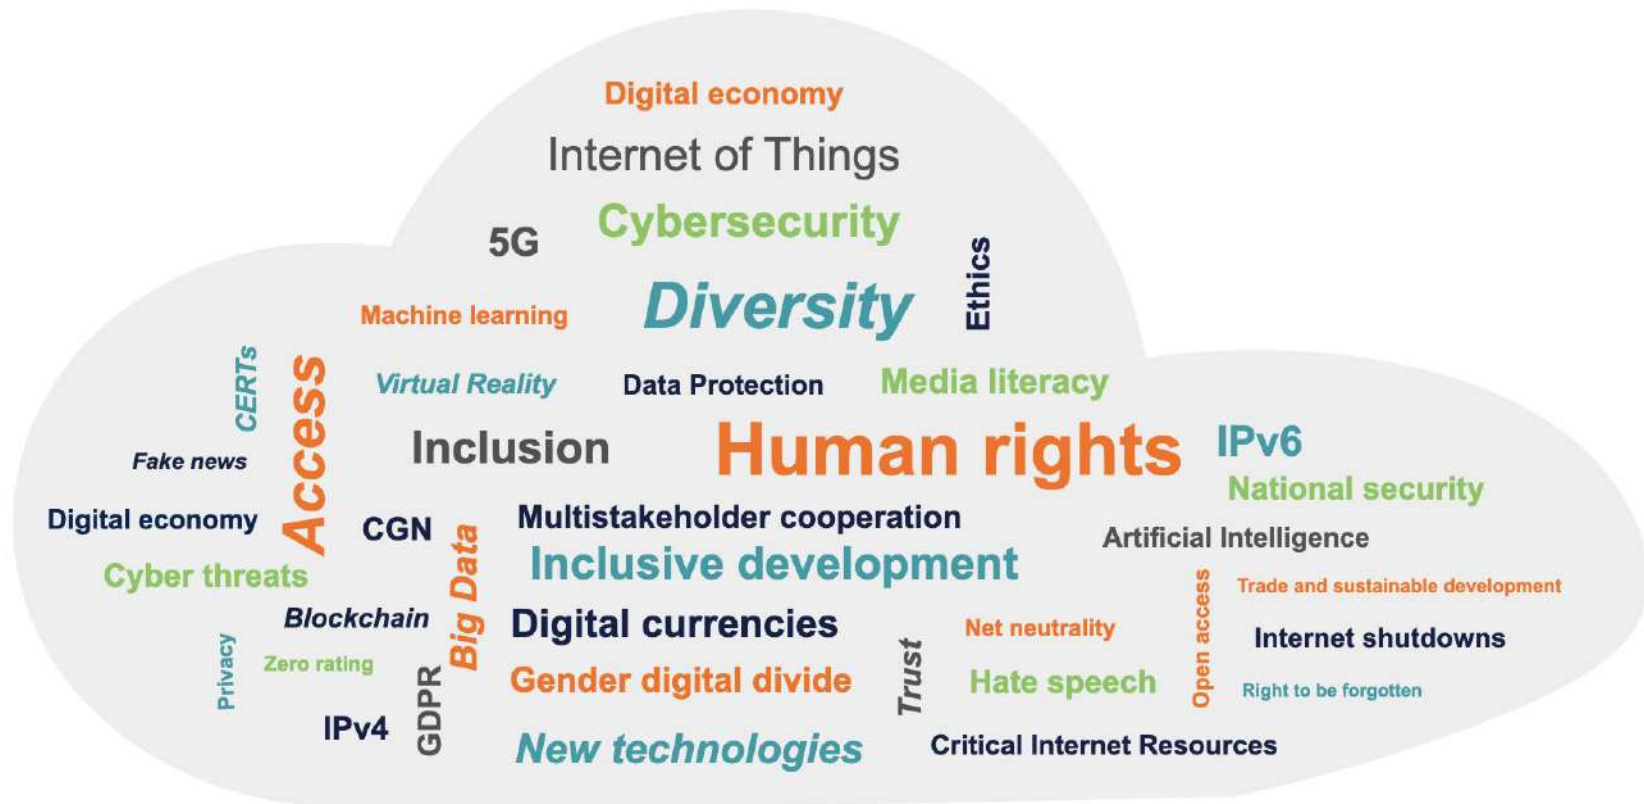

# Global Internet Governance Forum (IGF)

---

# Global Internet Governance Forum (IGF)

- 15-19 December 2024 in Riyadh, Saudi Arabia
- “Building our Multistakeholder Digital Future”
- Themes:
  - Harnessing innovation and balancing risks in the digital space
  - Enhancing the digital contribution to peace, development, and sustainability
  - Advancing human rights and inclusion in the digital age
  - Improving digital governance for the Internet We Want

- 8500 participants (online and on-site)
- 175 countries
- 300+ sessions

Key messages:

[https://www.intgovforum.org/en/filedepot\\_download/300/26576](https://www.intgovforum.org/en/filedepot_download/300/26576)

# The Road Ahead

---

# Challenges

- The increasing consolidation of the Internet industry
- Digital sovereignty / Internet fragmentation
- Attracting and keeping the interest of business, governments and technical community
- IG events: Lack of secure funding and no tangible results or decisions
- Some important discussions, esp. about economy and trade, are not open

# Challenges

- Successful IGFs with clearer outcomes
- Business and government interest rejuvenated
- Increased commitment to the multistakeholder approach
- Support diminishes for a multistakeholder approach
- Governments re-assert unilateral regulation of Internet
- Globally, governments look to international organisations to govern

# Questions & Comments

# Recent Internet Governance Events

**1.**

Global Digital  
Compact (GDC)

**2.**

World Summit on  
Information Society  
(WSIS) +20 review

# Global Digital Compact

---

## GDC in a nutshell

- Global digital compact (GDC) is an annex to the Pact of the Future
- Adopted at the United Nations Summit of the Future in New York on September 22-23, 2024
- By consensus of 193 member states of the UN
- GDC is a "*comprehensive framework for global governance of digital technology and artificial intelligence*"
- Not legally binding, intended to provide governments with guidance

## 5 objectives of GDC - to put it in perspective

- Close all digital divides and accelerate progress across the **Sustainable Development Goals**
- Expand **inclusion** in and benefits from the digital economy for all
- Foster an inclusive, open safe and secure digital space that respects, protects and promote **human rights**
- Advance responsible, equitable and interoperable **data governance** approaches
- Enhance international governance of **artificial intelligence** for the benefit of humanity

## Reaffirmation of the status quo of the Internet Governance

- The **multi-stakeholder nature** of the Internet governance is recognised, with full involvement of other stakeholders
- **Technical community** highlighted as a stakeholder group among Governments, the private sector, civil society, international organizations and academic community
  - *"in their respective roles and responsibilities"*
- The importance of the **Internet Governance Forum** acknowledged as the primary multi-stakeholder platform for discussion of Internet governance issues

## Concerns expressed by multi-stakeholder community

- Critique on the process
  - Lack of collaboration between the member states in the negotiation process
  - Lack of transparency on how various positions of non-governmental stakeholders were recorded and incorporated into the document
- Reaffirmation of the status quo of the Internet Governance, however:
  - Last minute amendment proposals undermined the multistakeholder governance model of the Internet
  - The paragraphs that addressed the funding of the IGF were taken out
  - China and G77 group (134 countries) advocated for a more state-driven approach to Internet governance and digital technologies
- Risk of duplicating efforts with new institutions (Digital Cooperation Forum) instead of strengthening existing ones - **Geneva - NY tension**

## What does it mean for the future?

- The document authorises a new set of processes and organs - a shift towards more UN involvement in Internet Governance processes
  - The UN Tech Envoy will have general digital governance coordination functions
- What role the GDC will play in the World Summit on Information Society (WSIS)+20 review?
  - “We look forward to the **WSIS+20 review** in 2025 and invite it to identify how these processes and forums can support the contribution of all stakeholders to **implementation** of the Compact”

# WSIS +20

---

## Timeline

- WSIS+20 High-level event - May 2024 Geneva, Switzerland
- WSIS+20 High-level event - July 2025 Geneva, Switzerland
- UN High-level meeting on the WSIS process (review of the implementation) - Sep 2025  
New York, USA

## What does it mean for the future?

- WSIS 2005 (Tunis Agenda) defined the past twenty years of the Internet Governance
  - Recognised bottom-up coordination, collaboration and inclusion as the most effective way to govern the Internet
  - Established the Internet Governance Forum (IGF)
- WSIS 2024: “The WSIS mechanisms have facilitated a functional interplay between **multilateral** and **multistakeholder** governance. These different approaches to governance should not be seen as mutually exclusive, but as complementary”
- Will WSIS+20 end up supporting the GDC and its implementation?
- WSIS 2025 - the IGF mandate beyond 2025 will be considered

# Upcoming Internet Governance Events

## SEEDIG 9

Belgrade, Serbia

25-26 Nov 2024

## Global IGF

Riyadh, Kingdom of Saudi Arabia

15-19 Dec 2024
