Subject: ENUM delegations of E.164 country codes

Dear Sir/Madam,

I am writing in response to the Liaison Statement sent from RIPE NCC to ITU-T Study Group 2 on ENUM and Interim procedures for Geographic Country Codes (reply to SG2-LS231).

Regarding ENUM delegations of E.164 country Code +888 for UN OCHA, 878 10 for UPT, and 882 34 for Identification codes for networks, I would like to inform you that these resources have been reclaimed and I request that these delegations be deregistered by RIPE NCC.

Regarding the other E.164 codes listed in the Liaison Statement, I would like to recall the interim procedures for Geographic Country Codes that were agreed by ITU-T and the Internet Architecture Board (IAB), and amended and agreed by ITU-T SG2 on 28 February 2019. The interim procedures can be found at the web site <https://www.itu.int/en/ITU-T/inr/enum/Pages/procedures.aspx>. Specifically, item 3.5 of the Interim procedures for Geographic Country Codes states that *“No change will take place until the concerned Member State has notified the TSB that it approves the change”*. I therefore request that RIPE NCC takes no further action regarding these or any other ENUM delegations without an explicit request from ITU.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'Chaesub Lee'.
